Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 1-7 are objected to because of the following informalities: Regarding claims 1-7 the claims have improper spaces.

Appropriate correction is required.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The reason for claim to be indefinite is that in claim 1, the preamble is a method but the body of the claim is a structure which makes it indefinite, whether the claim is a method or device claim.

Claims 2-7 are rejected as being dependent on claim 1.

Re. claim 1, line 7-8 the applicant recites "having a stamping pattern that corresponds to the information to be stored" which makes the claim indefinite as what is the relationship between the stamping pattern and information to be stored.

Allowable Subject Matter

4. Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

5. The following is an examiner's statement of reasons for allowance:

" stamping of the storage medium using the stamping die so as to make predetermined zones of the active layer electrically conductive by means of localized plastic deformation"

Re. claim 1, Mori et al.(US 2002/0036927) discloses a method of producing an irreversible storage medium comprising an array of memory cells each memory cell comprising one zone of an active layer arranged between first and second conductors, binary information stored in the memory cell being determined by the electrical conducting state of the corresponding zone, method characterized in that it comprises assembly of a blank storage medium having an active layer which is in an initial insulating state(Abstract). However Mori et al. does not disclose stamping of the storage medium using the stamping die so as to make predetermined zones of the active layer electrically conductive by means of localized plastic deformation.

Claims 1-7 are also allowed as being directly or indirectly dependent of the allowed independent base claim.
